  </div>
  <script src="app.js"></script>
</body>
</html>
```

[03/05, 5:05 am] Abhay..🤔🤔:

```
let display = document.getElementById("display") as HTMLInputElement;
```

```
function append(value: string): void {
  display.value += value;
}
```

```
function clearDisplay(): void {
  display.value = "";
}
```

```
function calculate(): void {
  try {
    display.value = eval(display.value).toString();
  } catch {
    display.value = "Error";
  }
}
```

[03/05, 5:05 am] Abhay..🤔🤔:

```
const fs = require('fs');
const path = require('path');
const file = path.join(__dirname, 'data.txt');

const createFile = (content) => {
  fs.writeFileSync(file, content, 'utf8');
  console.log('file created');
};
const readFile = () => {
  fs.existsSync(file);
  console.log(fs.readFileSync(file), 'utf8');
};
const updateFile = (content) => {
  if (fs.existsSync(file)) {
    fs.appendFileSync(file, '\n' + content, 'utf8');
    console.log('updated');
  } else {
    console.log("file not found");
  }
};
const deleteFile = () => {
  fs.existsSync(file);
  fs.unlinkSync(file);
  console.log('deleted');
};
module.exports = {createFile, readFile, updateFile, deleteFile};

const ops = require('./testo')
```

[03/05, 5:05 am] Abhay..🤔🤔:

```
const rl = require('readline').createInterface({
  input: process.stdin,
  output: process.stdout
});
const file = require('./testo');
```

```

function ask() {
  console.log('1,2,3,4,5');
  rl.question('Choose:', (choice) => {
    if (choice == 1) {
      rl.question('Content', (text) => {
        file.createFile(text);
        ask();
      })
    } else if (choice == 2) {
      file.readFile();
      ask();
    } else if (choice == 3) {
      rl.question('Content', (text) => {
        file.updateFile(text);
        ask();
      })
    } else if (choice == 4) {
      file.deleteFile();
      ask();
    } else if (choice == 5) {
      rl.close
    }
  });
}

```

ask()

[03/05, 5:20 am] Abhay..🙄🤔:

```

const express = require('express');
const session = require('express-session');
const app = express();

```

```

app.use(session({
  secret: 'secret',
  resave: false,
  saveUninitialized: true
}));

```

```

app.get('/', (req, res) => {
  req.session.views = (req.session.views || 0) + 1;
  res.send(`
    <h1>${req.session.views > 1 ? 'Welcome back!' : 'Hello, first time here!'}</h1>
    <p>Views: ${req.session.views}</p>
    <a href="/logout">Logout</a>
  `);
});

```

```

app.get('/logout', (req, res) => {
  req.session.destroy(() => {
    res.send('<h1>Logged out</h1><a href="/">Home</a>');
  });
});

app.listen(3000, () => console.log('🚀 http://localhost:3000'));

```

[03/05, 5:29 am] Abhay.. 🙄🤔:

```

<!DOCTYPE html>
<html ng-app="helloApp">
<head>
  <meta charset="UTF-8">
  <title>Hello AngularJS</title>
